Dear Members and Guests:

It is my personal honor and pleasure to welcome all of you to our 14th Annual Congress of the Asian Society for Vascular Surgery, the 16th Congress of the Turkish Society for Vascular and Endovascular Surgery, and the 8th Asian Venous Forum, which is being held in the beautiful city of Istanbul, Turkey, October 26-29, 2013. Istanbul is one of the most magical and fascinating sights of UNESCO’s world heritage, bridging Asia and Europe. I personally have very fascinating and fond memories of this wonderful city from 1997, when we brought the 39th Annual World Congress of the International College of Angiology to this transcontinental city.

The organizing committee of this Congress has worked diligently to put together a fantastic scientific program. As you meet new friends and renew old friendships, you will witness firsthand the outstanding scientific podium with its dissemination of state-of-the-art clinical practices, cutting edge scientific technologies, and newer clinical and basic research related to vascular disciplines. There will be presenters and attendees, not only from Asian countries, but from every corner of the globe. Since its foundation in 1992, the ASVS has evolved as one of the most successful scientific organizations in the world, attracting many scientists, young investigators, and clinicians worldwide. The ASVS, with its members of all the Asian countries united under one scientific society, we now are able to provide a brilliant scientific podium to the world, thereby contributing to the welfare of our population and patients. As a unified voice of the Society, we are now able to make greater global advancements to the scientific community.

As a part of our continuing academic support to our Society, the late Professor Yoshio Mishima and I decided to have the International Journal of Angiology (an indexed international cardiovascular journal) contribute as an Official Journal of our Society from the time of the society’s foundation.

This podium will also provide future generations of vascular specialists the ability to express and present their scientific data, and meet with mainstream international scientific community members as equal partners and leaders.

During your stay in Istanbul, you and your family will be able to enjoy the scientific sessions, and partake in the incredible social events including sightseeing programs, exploring this fantastic old city which dates back 8,000 years. Istanbul has been the capital of three successful great empires, the Eastern Roman, Byzantine, and the Ottoman Empires. Members of the organizing committee and officers will be more than happy to assist you in making your stay in Istanbul a most memorable and enjoyable one.

I personally wish each and every one of you happiness and success at this Congress, and a wonderful future.

Sincerely,

John B Chang, MD, FACS, FICA
Founding Chairman, Asian Society for Vascular Surgery
Dear Colleagues and Friends,

Welcome to Istanbul to enjoy the famous Turkish hospitality.

For ASVS 2013 meeting in Istanbul, we are partnering with the Turkish Society for Vascular Surgery who will be holding their Annual Congress at the same time (16th Congress of Turkish Society for Vascular and Endovascular Surgery) in cooperation with Turkish Society of Phlebology. 8th Asian Venous Forum will also take place during ASVS 2013.

Istanbul is one of the most magical and enchanting sites of UNESCO World heritage bridging Asia and Europe. It is endowed with unrivaled beauty complimented by unique harmony of ancient and contemporary, oriental and occidental. The city is located at the crossroads of civilizations and is the only major city in the world built on two continents. It bridges Europe and Asia geographically and culturally. The history of the city dates back 8,000 years, and having been the capital for three successive great empires, Eastern Roman, Byzantine, and Ottoman, it has been a melting pot for various cultures and religions.

The meeting, already a standard-setting tradition in inter-collegiate dissemination of state-of-the-art clinical practices, cutting edge scientific achievements, and industrial advances in vascular surgery; will be attended nationally and internationally by upwards of 1400 surgeons, specialists in related fields, and scientists.

We aim to exceed the well-established superior quality of the previous meetings, and make this meeting a memorable and rewarding experience for all participants.

With warmest regards,

Prof. Dr. A. Kürşat Bozkurt

Conformability without Compromise

Pre-Intervention

Post-intervention

The new Conformable GORE® TAG® Thoracic Endoprosthesis offers a unique 6–33% oversizing window:

- Allows physicians to choose lower radial force at the low end or higher radial force at the high end of the device sizing window, depending on patient anatomy.
- A single straight device can be used to treat tapered aortas.
- 16–42 mm vessel diameters can be treated with as few as five device sizes.
